ANNOUNCE

THE AUTUMN WORKSHOP IN ENVIRONMENTAL ECONOMICS

September 28 - October 2, 1992

QUANTITATIVE METHODS IN ENVIRONMENTAL ECONOMICS

Lecturers

Martin Weale, University of Cambridge
The Environment and National Accounts

Lars Bergman, Stockholm School of Economics
Computable General Equilibrium Models and Applications to
Environmental Economics

Alistair Ulph, University of Southampton
The Environment in International Trade Models

Per-Olav Johansson, Stockholm School of Economics
Empirical Methods for Environmental Evaluation

**under the auspices of the
European Association of Environmental and Resource Economists**

There will be a maximum of 20 students who should be graduate students in either economics or environmental sciences or post-graduate researchers wishing to expand their knowledge in these fields. Students will attend all morning lectures together and then split up for the afternoon work groups, each of which will be directed by one of the lecturers. All expenses must be borne by the student but reasonable lodging rates are available to students (approximately US \$32 for double occupancy per person per night). Applicants should send a formal letter of application, in which they state their choice of workgroup, along with a curriculum vitae and recommendation to: Alessandro Franchini, Istituto Veneto, Santo Stefano 2945, 30124 Venezia, Italy (Fax 39-41-5210598) by May 31st, 1992.
